SKILLS

Programming

- JavaScript
- C++ | Python

Frameworks:

- ReactJS | React Native
- TailwindCSS | BootstrapCSS

Familiar:

- Git | SQL
- NodeJS

CERTIFICATIONS

- SAP S/4HANA System Administration (CTADM23)
SAP, Mar 2025
- Blockchain and its Applications
NPTEL, IIT Kharagpur, Apr 2024
- AI-ML Virtual Internship
AICTE - EduSkills, Nov 2023
- ReactJS
NullClass, Jan 2023

COURSEWORK

- Object Oriented Programming
- Database Management System

EXPERIENCE

TATA CONSULTANCY SERVICES (TCS)

Aug 2024 - Present

SAP BASIS CONSULTANT | CLIENT: IPSSEN PHARMA

- Maintained **system stability** and **high availability** for the client's SAP landscape through proactive **daily monitoring** and administration of **SAP, iPaaS, and BODS jobs**.
- Facilitated a streamlined and error-free promotion of system changes by managing the full lifecycle of **Transport Requests (TRs)**.
- Enhanced **system security and functionality** by executing **system installations, patch upgrades (SWPM, SPAM), and Kernel/Host Agent upgrades** on **S/4 HANA and Netweaver landscapes**.
- Ensured a **secure and compliant** SAP environment by meticulously managing **user administration, client/spool configuration, and authorization management**.
- Managed the end-to-end deployment lifecycle for all system and application jobs, executing promotions from **DEV to PROD** and performing **pre-production validation** before the final release.
- Contributed to **system resilience** and minimized downtime by providing **OS patching support** within standalone and **cluster-based high availability (HA)** environments.

PROJECTS

PERSONAL PORTFOLIO WEBSITE

Dec 2020 - Present

Live Project | GitHub

- Incorporated modern web development techniques such as **CSS Grid** and **Flexbox** for layout design, providing flexibility and scalability for future updates.
- Employed **JavaScript** and **LocalStorage** to implement **Dark** and **Light Mode** functionality, enhancing user experience by allowing customization.
- Utilized **SVG** animations to create visually appealing and interactive elements, enhancing the overall aesthetics and engagement of the website.
- Hosted on **Netlify** | Tech-Stack: HTML, CSS, JavaScript

FOODY BUDDY

Live Project | GitHub

Mar 2024 - May 2024

- Built a cross-platform mobile application using **React Native**, ensuring seamless functionality on both iOS and Android devices.
- Leveraged Google Firestore for **User Creation, User Login** and **Database** solutions, enabling efficient data storage and synchronization.
- Implemented personalized **Food Recommendations** by creating user embeddings based on height, weight, gender, and food preferences, matched against a comprehensive food database.
- Enables **Detailed Tracking** of food consumption, storing macros information to help users manage their dietary goals.
- Connected to an IoT device to monitor heart rate and steps walked, facilitating calculation of calories burnt.
- Hosted on **Netlify** | Tech-Stack: React Native, Google Firebase, Node
